

Project Description

The Florida Department of Transportation (FDOT) is planning to construct a truck and freight parking facility adjacent to eastbound Interstate 4 (I-4) in Volusia County.

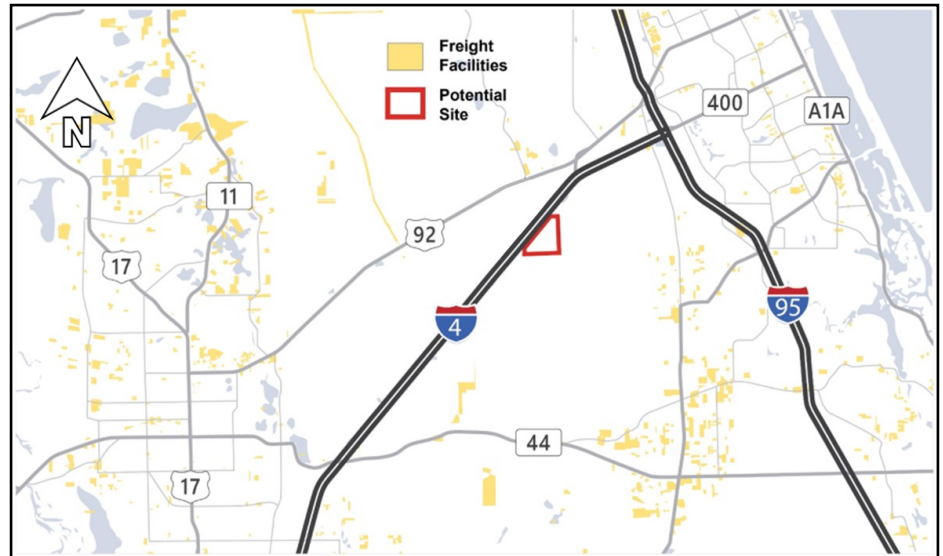

The proposed site is about 4.8 miles west of I-95, near the location of the former rest area. The facility will be accessed by entrance and exit ramps on I-4.

The proposed location is one of five potential sites identified along the I-4 corridor from Osceola County to Volusia County.

The preferred locations were determined during a Project Development and Environment (PD&E) Study, which is expected to finish in spring 2024. The purpose of the project is to provide needed truck parking space to serve regional freight parking demand and enhance safety and mobility.

The proposed eastbound I-4 facility would cover about 73.3 acres and have room for an estimated 275 truck parking spaces. The exact configuration will be determined during design.

A large restroom facility is proposed at the front of the truck parking site, and a small restroom facility is planned at the back of the site. Wildlife fencing and wildlife sensitive lighting will be provided due to the proximity of existing wildlife. Landscaping will also be included.

Conceptual Site Plan I-4 Eastbound
