## TYPICAL SECTION

The project's proposed roadway typical section consists of a four-lane divided roadway with two 12-foot-wide travel lanes in each direction, a 40-foot-wide grass separated median and either a sidewalk or shared-use path that varies in width.

## TRAFFIC SIGNALS

Project limits for this widening project were recently extended to allow for improvements at the intersection of U.S. 17 at Ponce Deleon Boulevard and East Baxter Street.

Improvements being proposed at this intersection include:

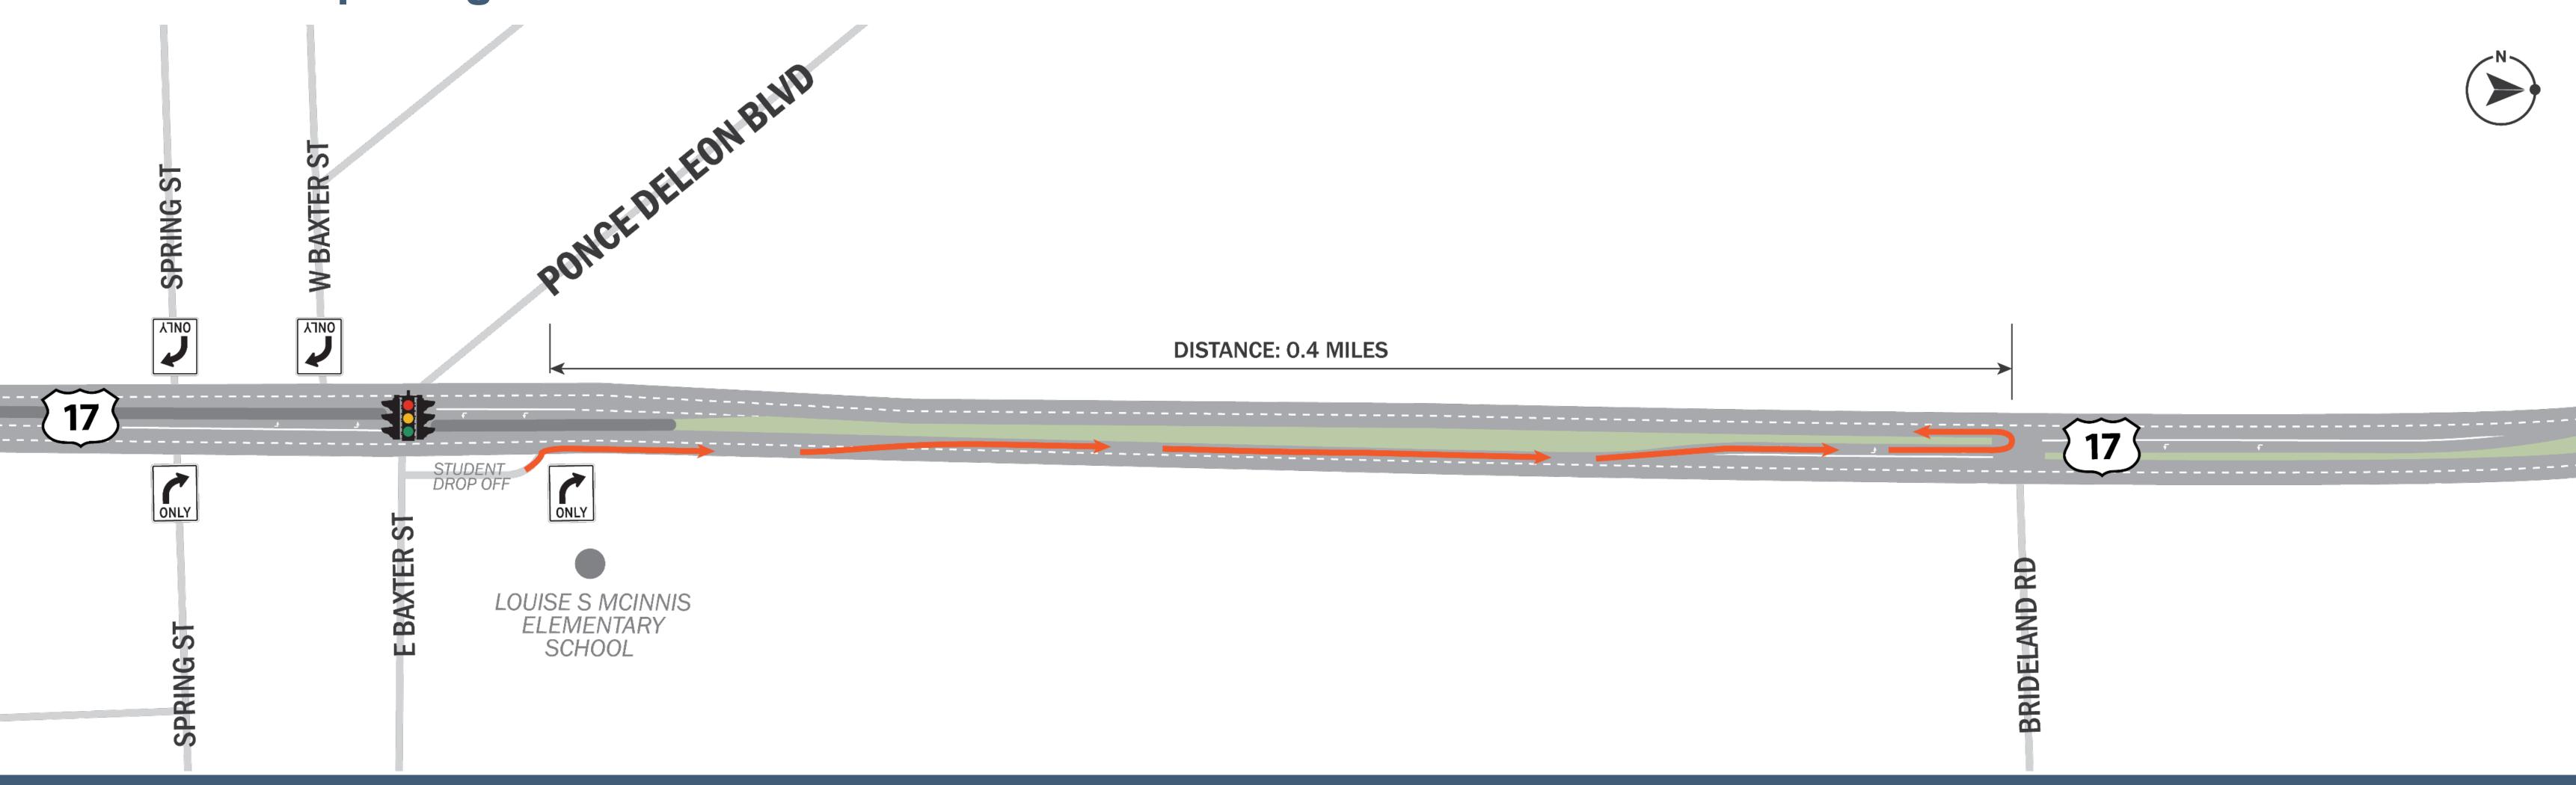

- the addition of traffic signals
- the relocation of crosswalks within the school zone and
- the closure of the median openings at Spring Street and West Baxter Street

### MID-BLOCK DIRECTIONAL MEDIAN CLOSURE

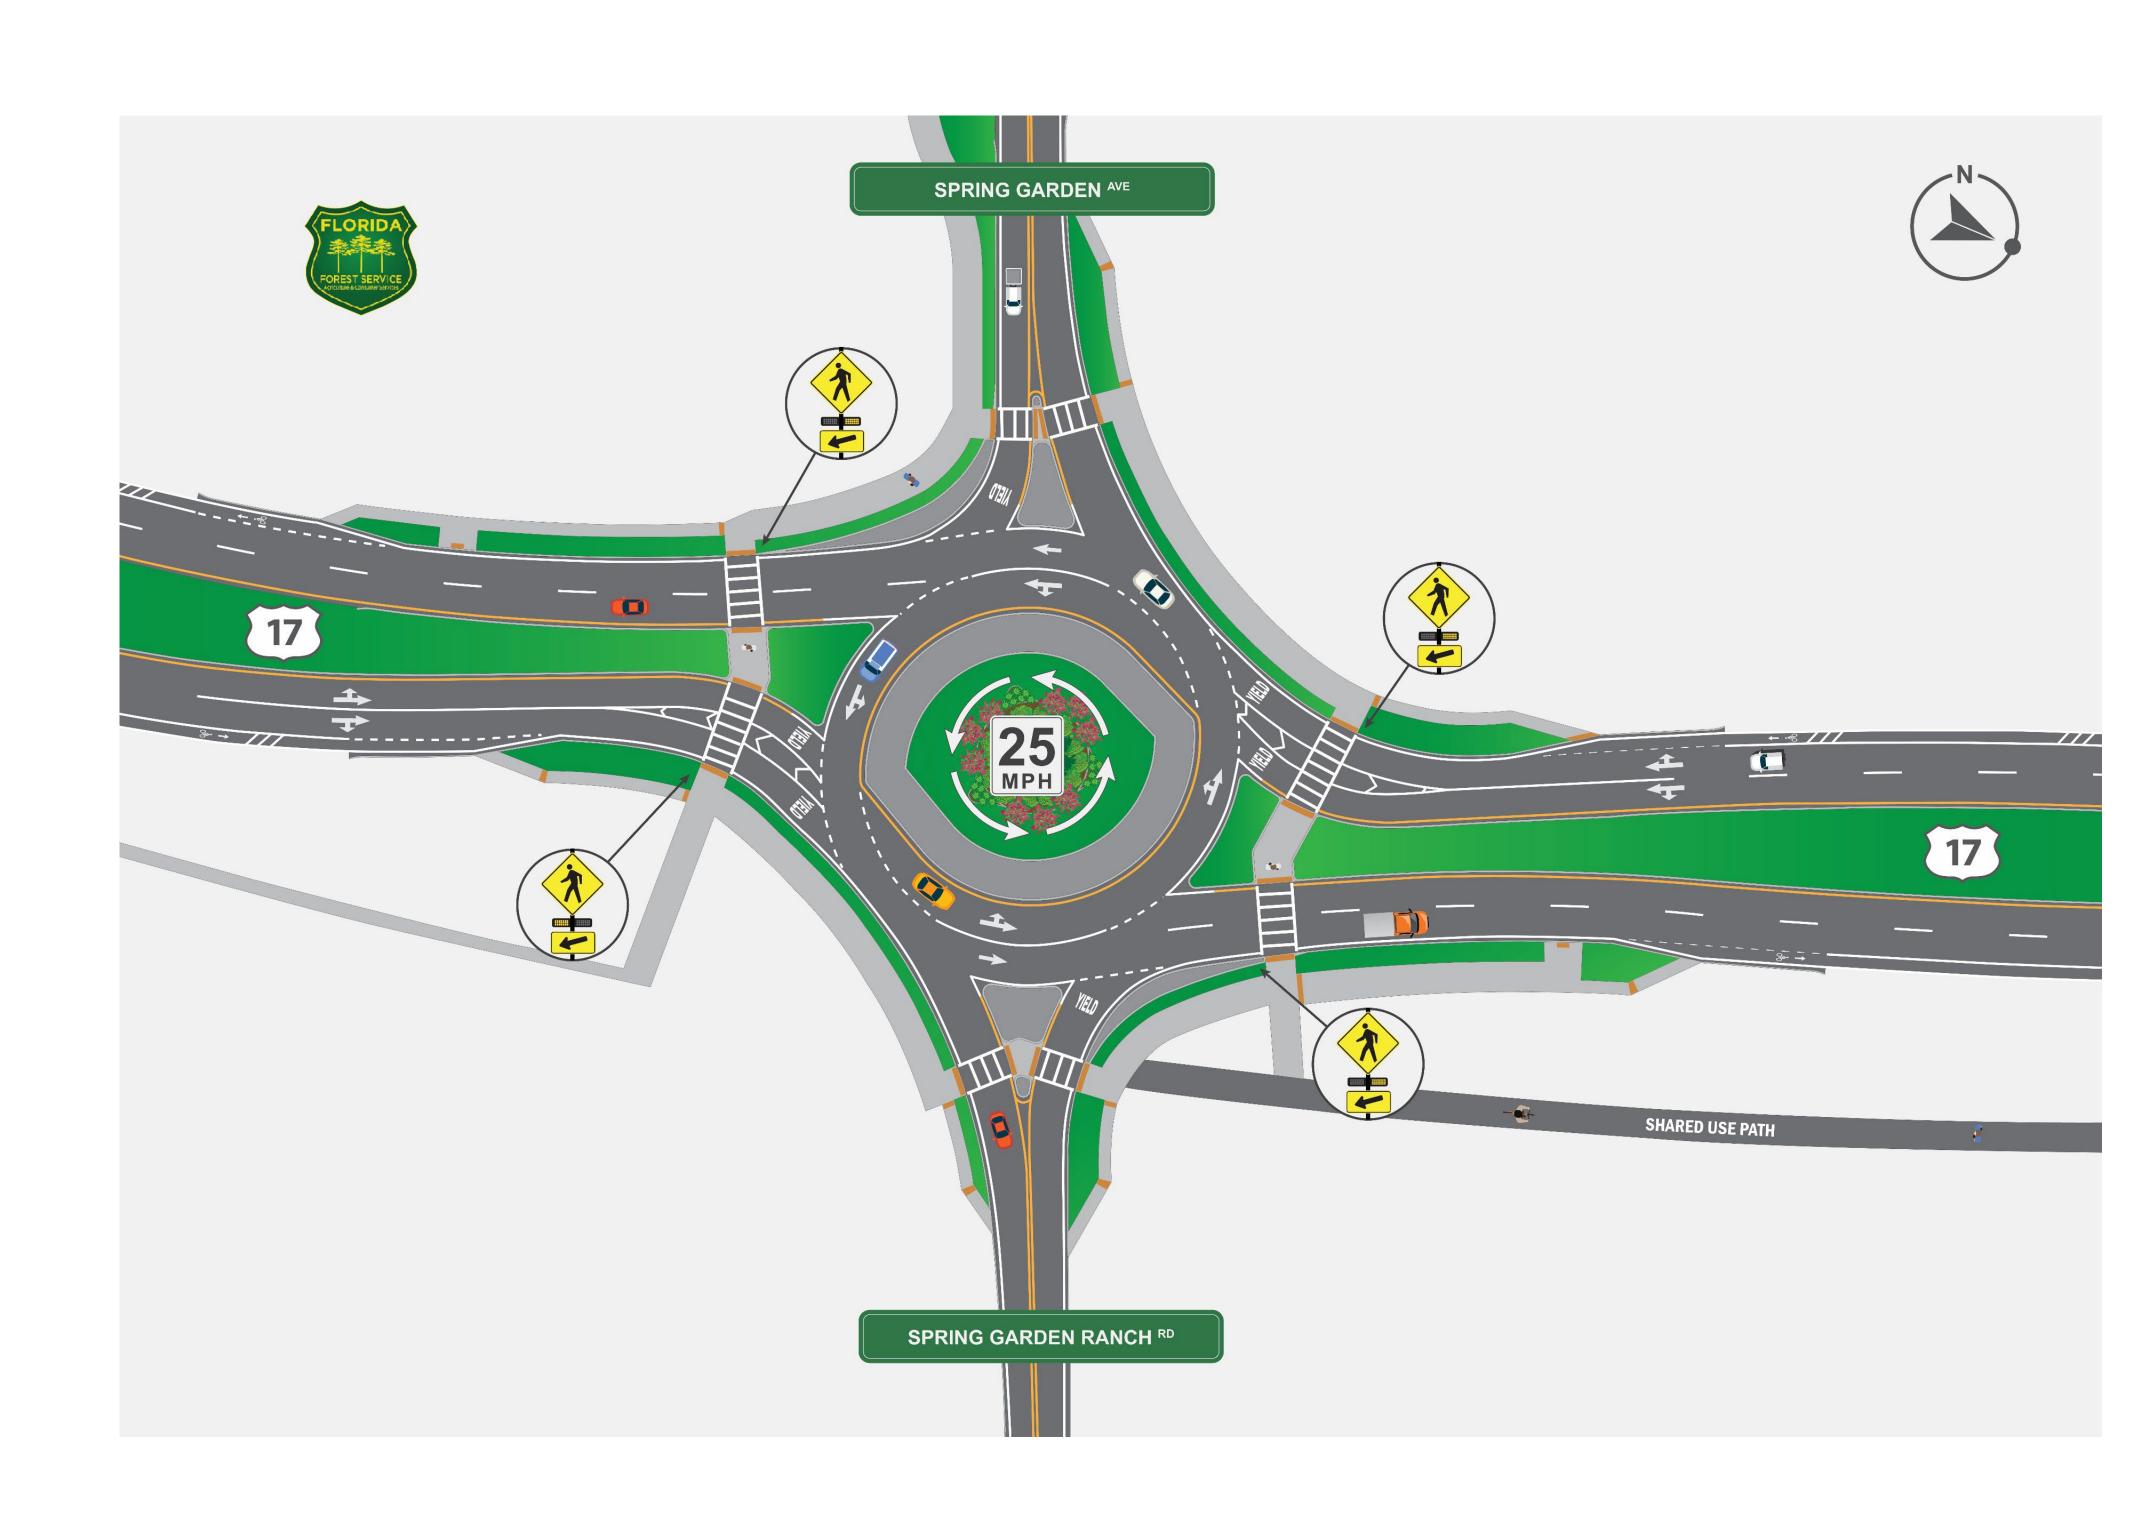

- To further enhance safety, the mid-block directional median opening currently available to allow left turns from the Louise McInnis Elementary student drop-off area onto southbound U.S. 17 is proposed to be closed
- All vehicles leaving the student drop-off area will now be required to make a right onto U.S. 17
- Drivers wishing to travel south on U.S. 17 would then need to make a U-turn at the newly proposed full median opening at Bridleland Road

### SPRING GARDEN RANCH ROAD ROUNDABOUT

- FDOT evaluated different control options to enhance safety at the intersection of U.S. 17 and Spring Garden Ranch Road, including traffic signals and a roundabout
- The evaluation looked at both operational and safety benefits at the intersection
- A roundabout was selected as the preferred option to achieve enhanced safety and operational goals
- The pedestrian crossings on U.S. 17 would be equipped with Rectangular Rapid Flashing Beacons (RRFBs)
